

# BKS<sup>®</sup> Revision

## Restoration Refined

Offering maximum intraoperative flexibility, the new BKS Revision System provides Tailored Solutions, Enhanced Stability, and Exceptional Efficiency.

Setting the Standard for Revision Solutions.

### **Tailored Solutions**

BKS Revision was developed with multiple options to improve intraoperative flexibility.

- **Choice -** BKS Revision exclusively offers both sleeves and patented<sup>1</sup> cones, providing more options for you and your patient
- Adaptable All in one system increases options to address bone loss
- **Fine Tuning -** Ability to dial in size, constraint, translation, rotation and balance

#### **Enhanced Stability**

BKS Revision is built with structure and fixation features to help achieve positive outcomes.

**Fixation -** Porous sleeves and cones establish initial support and promote fixation

**Strength -** Patented<sup>2</sup> one-step tibial locking mechanism proven to reduce micromotion

Structure - Multiple stem options to provide diaphyseal stability

### **Exceptional Efficiency**

BKS Revision is designed with instrumentation and implants to provide a unique experience.

- **Streamlined -** Step-by-step workflow helps improve surgical team efficiency
- **Compatible -** System allows for simple transition from primary to revision procedures
- **Options -** Sleeves and cones in one system provide unmatched intraoperative solutions

<sup>1</sup>US Patent No. D901012, D901013, D901014, <sup>2</sup>US Patent No 6,379,388
